

ZDAPMB1

Mercedes Vito

- 2021
- W447 (Facelift)
- Audio 30

Stereo Removal 1

Use a plastic pry tool on the outer edges of the plastic panel to loosen the clips all around. (The whole panel comes off in one piece)

Stereo Removal 2

Tools required:

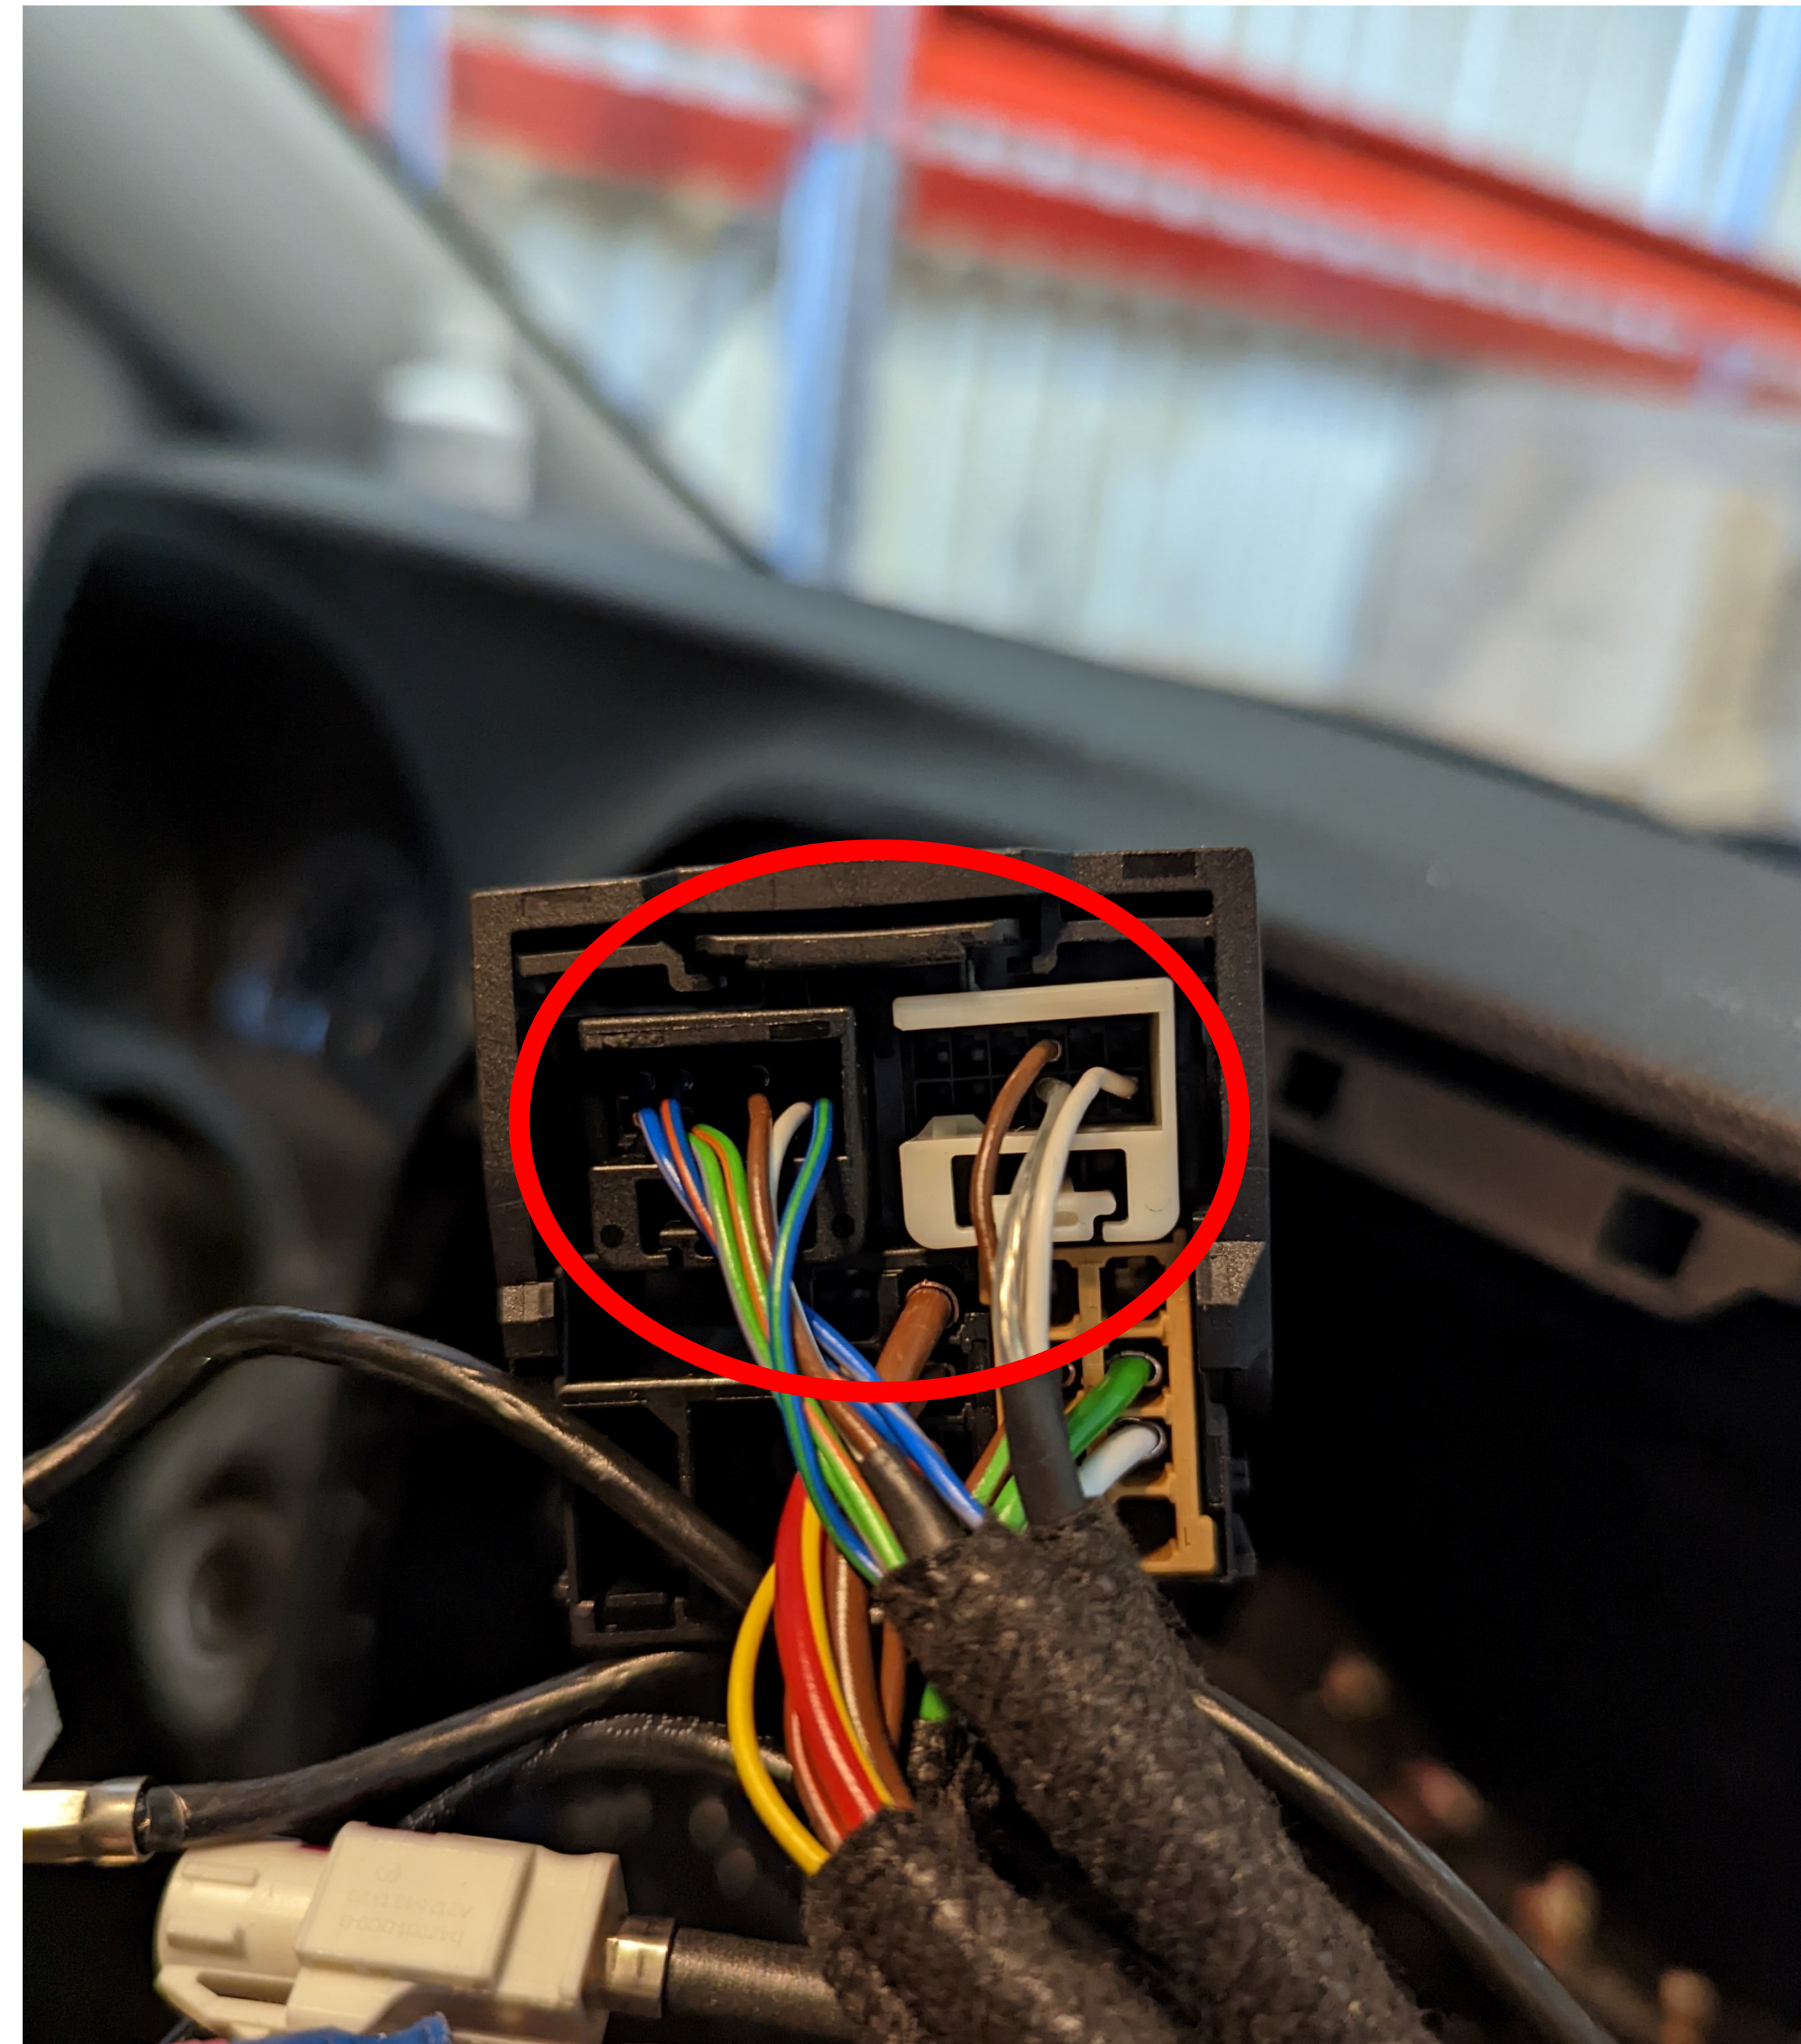

- Torx T25 bit

Loosen the four screws marked with red circles. Then the stereo is loose and ready to be taken out. Remove all connectors on the back of the stereo.

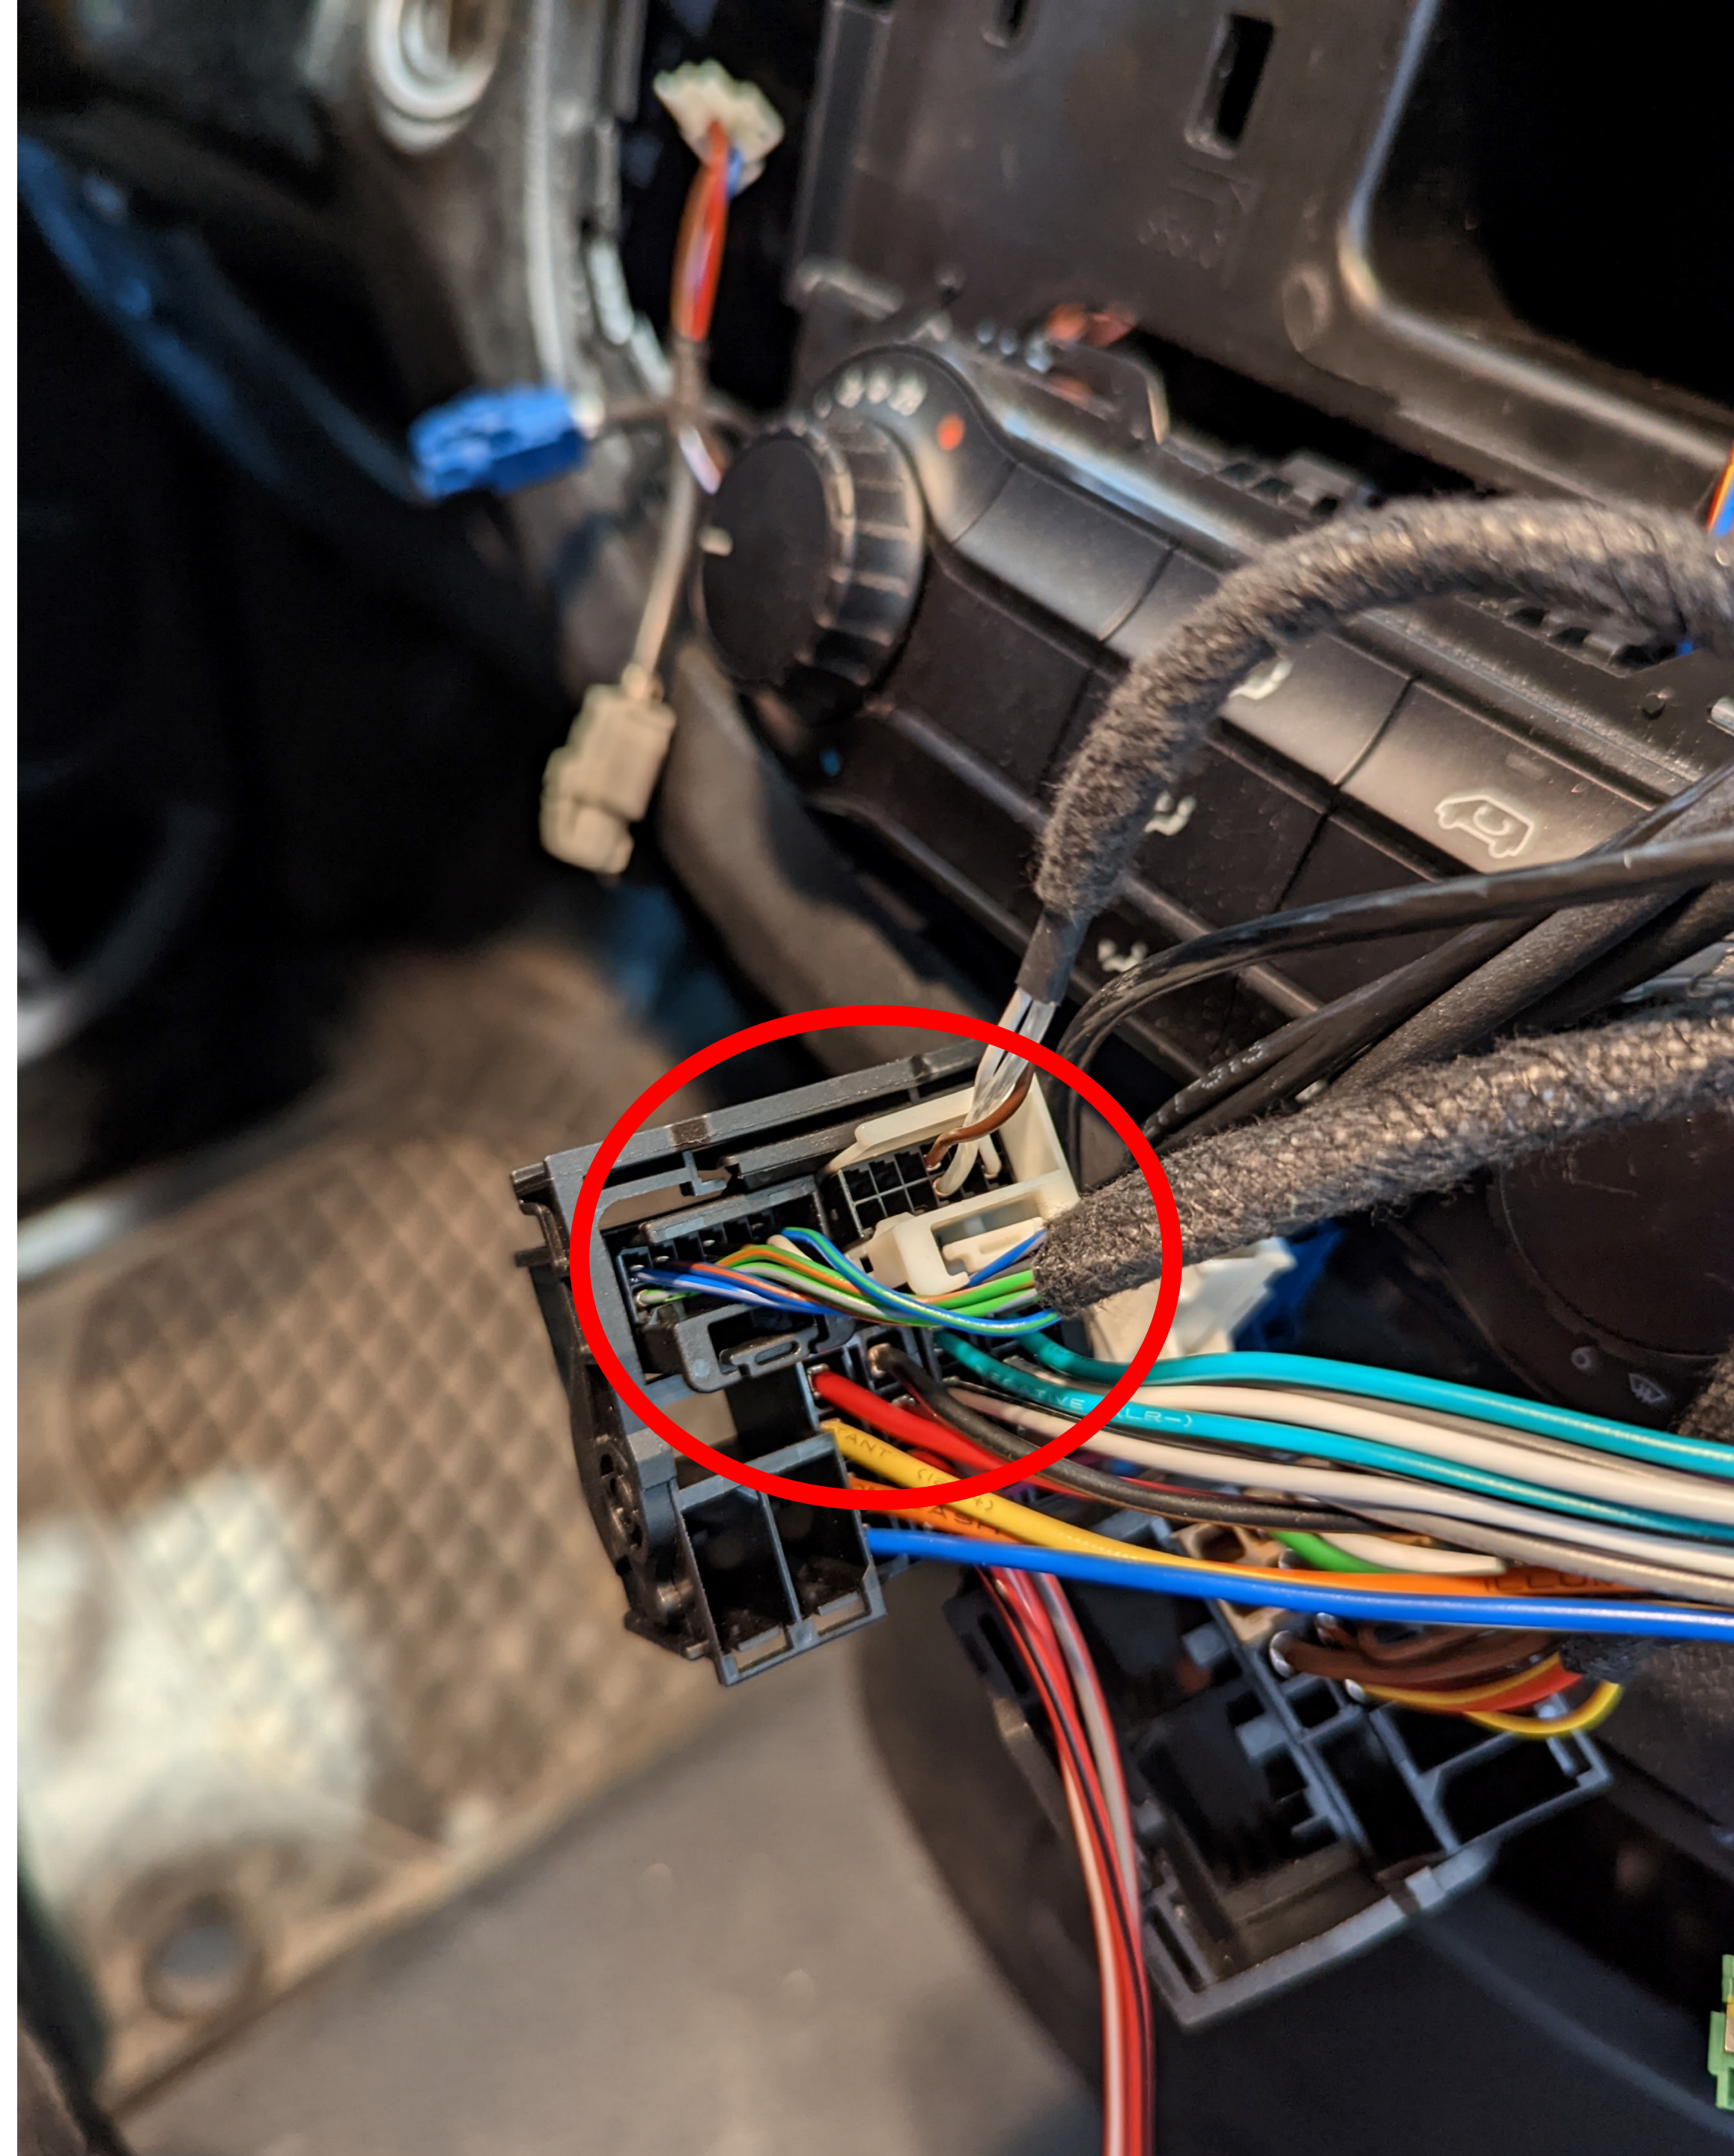

Cable Installation 1

Remove the black and white connectors on the back of the quadlock connector.

Cable Installation 2

Connect the black and white connectors to the CT10MC02 quadlock connector.

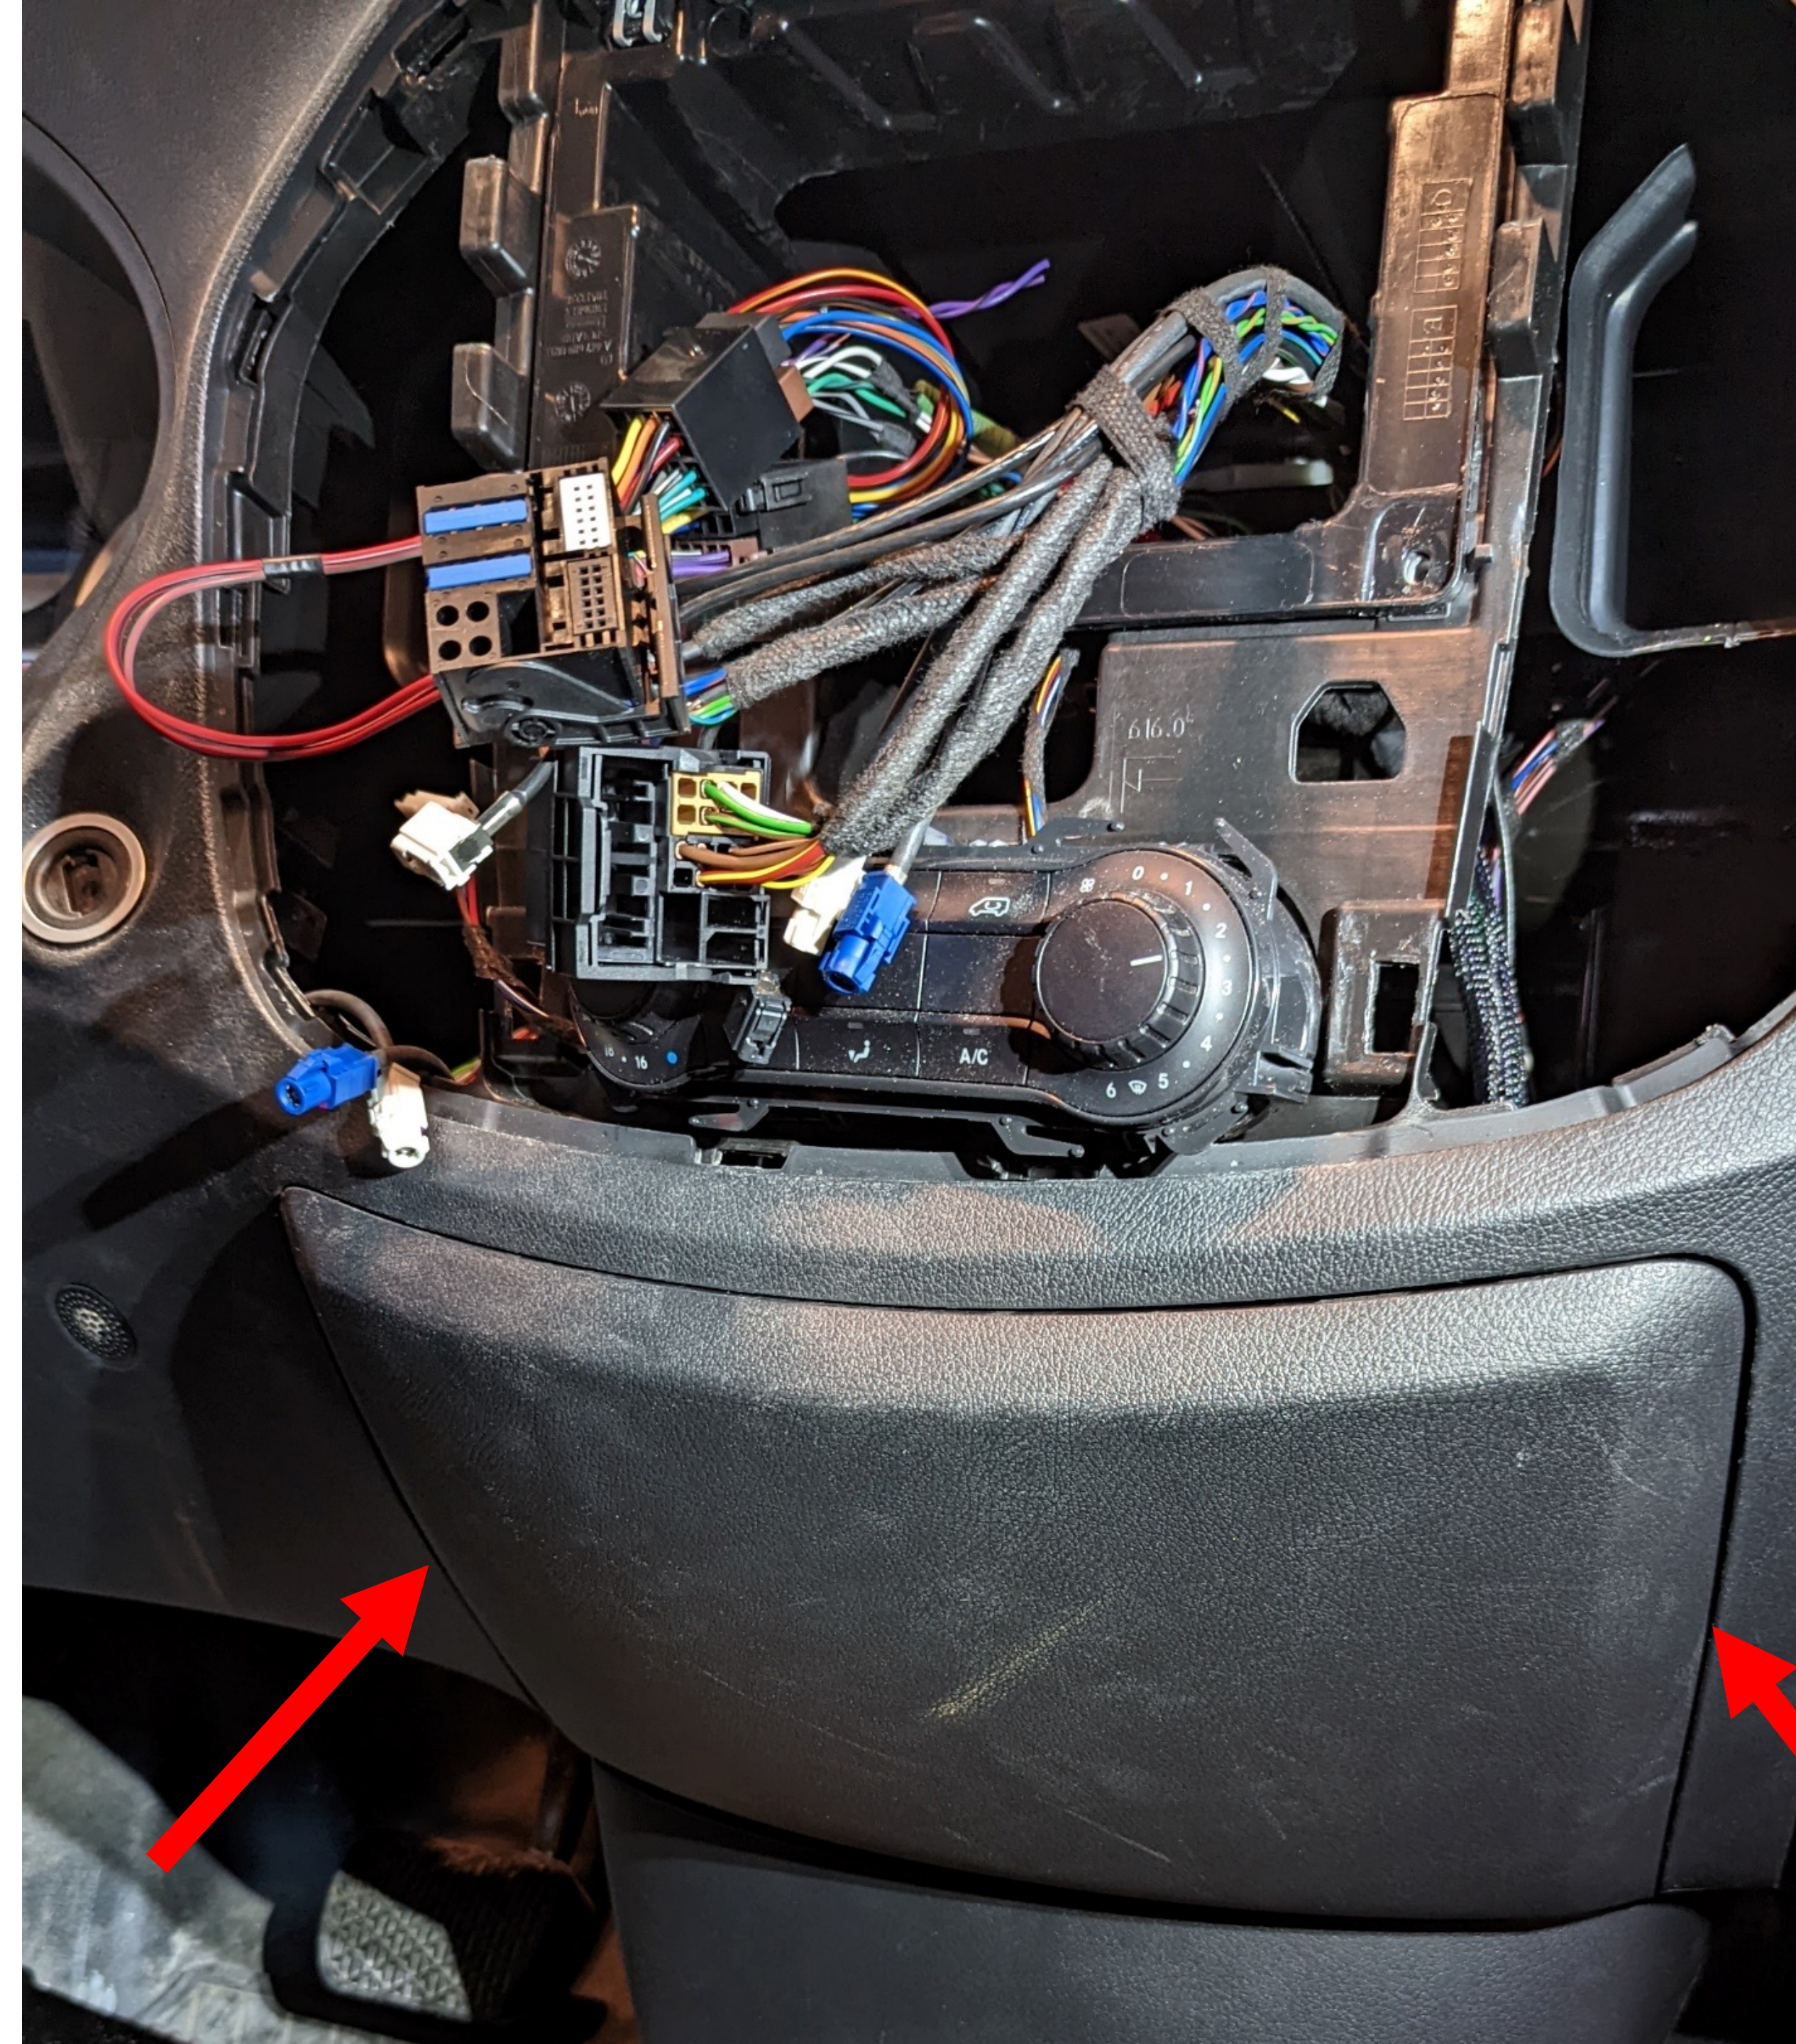

Cable Installation 3

Tools required:

- Plastic pry tool

Use a plastic pry tool to remove the center panel for easier cable laying.

Cable Installation 4

Tools required:

- Torx T25 Bit

1. Remove the lower center panel. On each side there is a plastic lid, remove both of them and loosen the T25 screw hidden behind.
2. Pull the panel towards you from the center to loosen the panel.

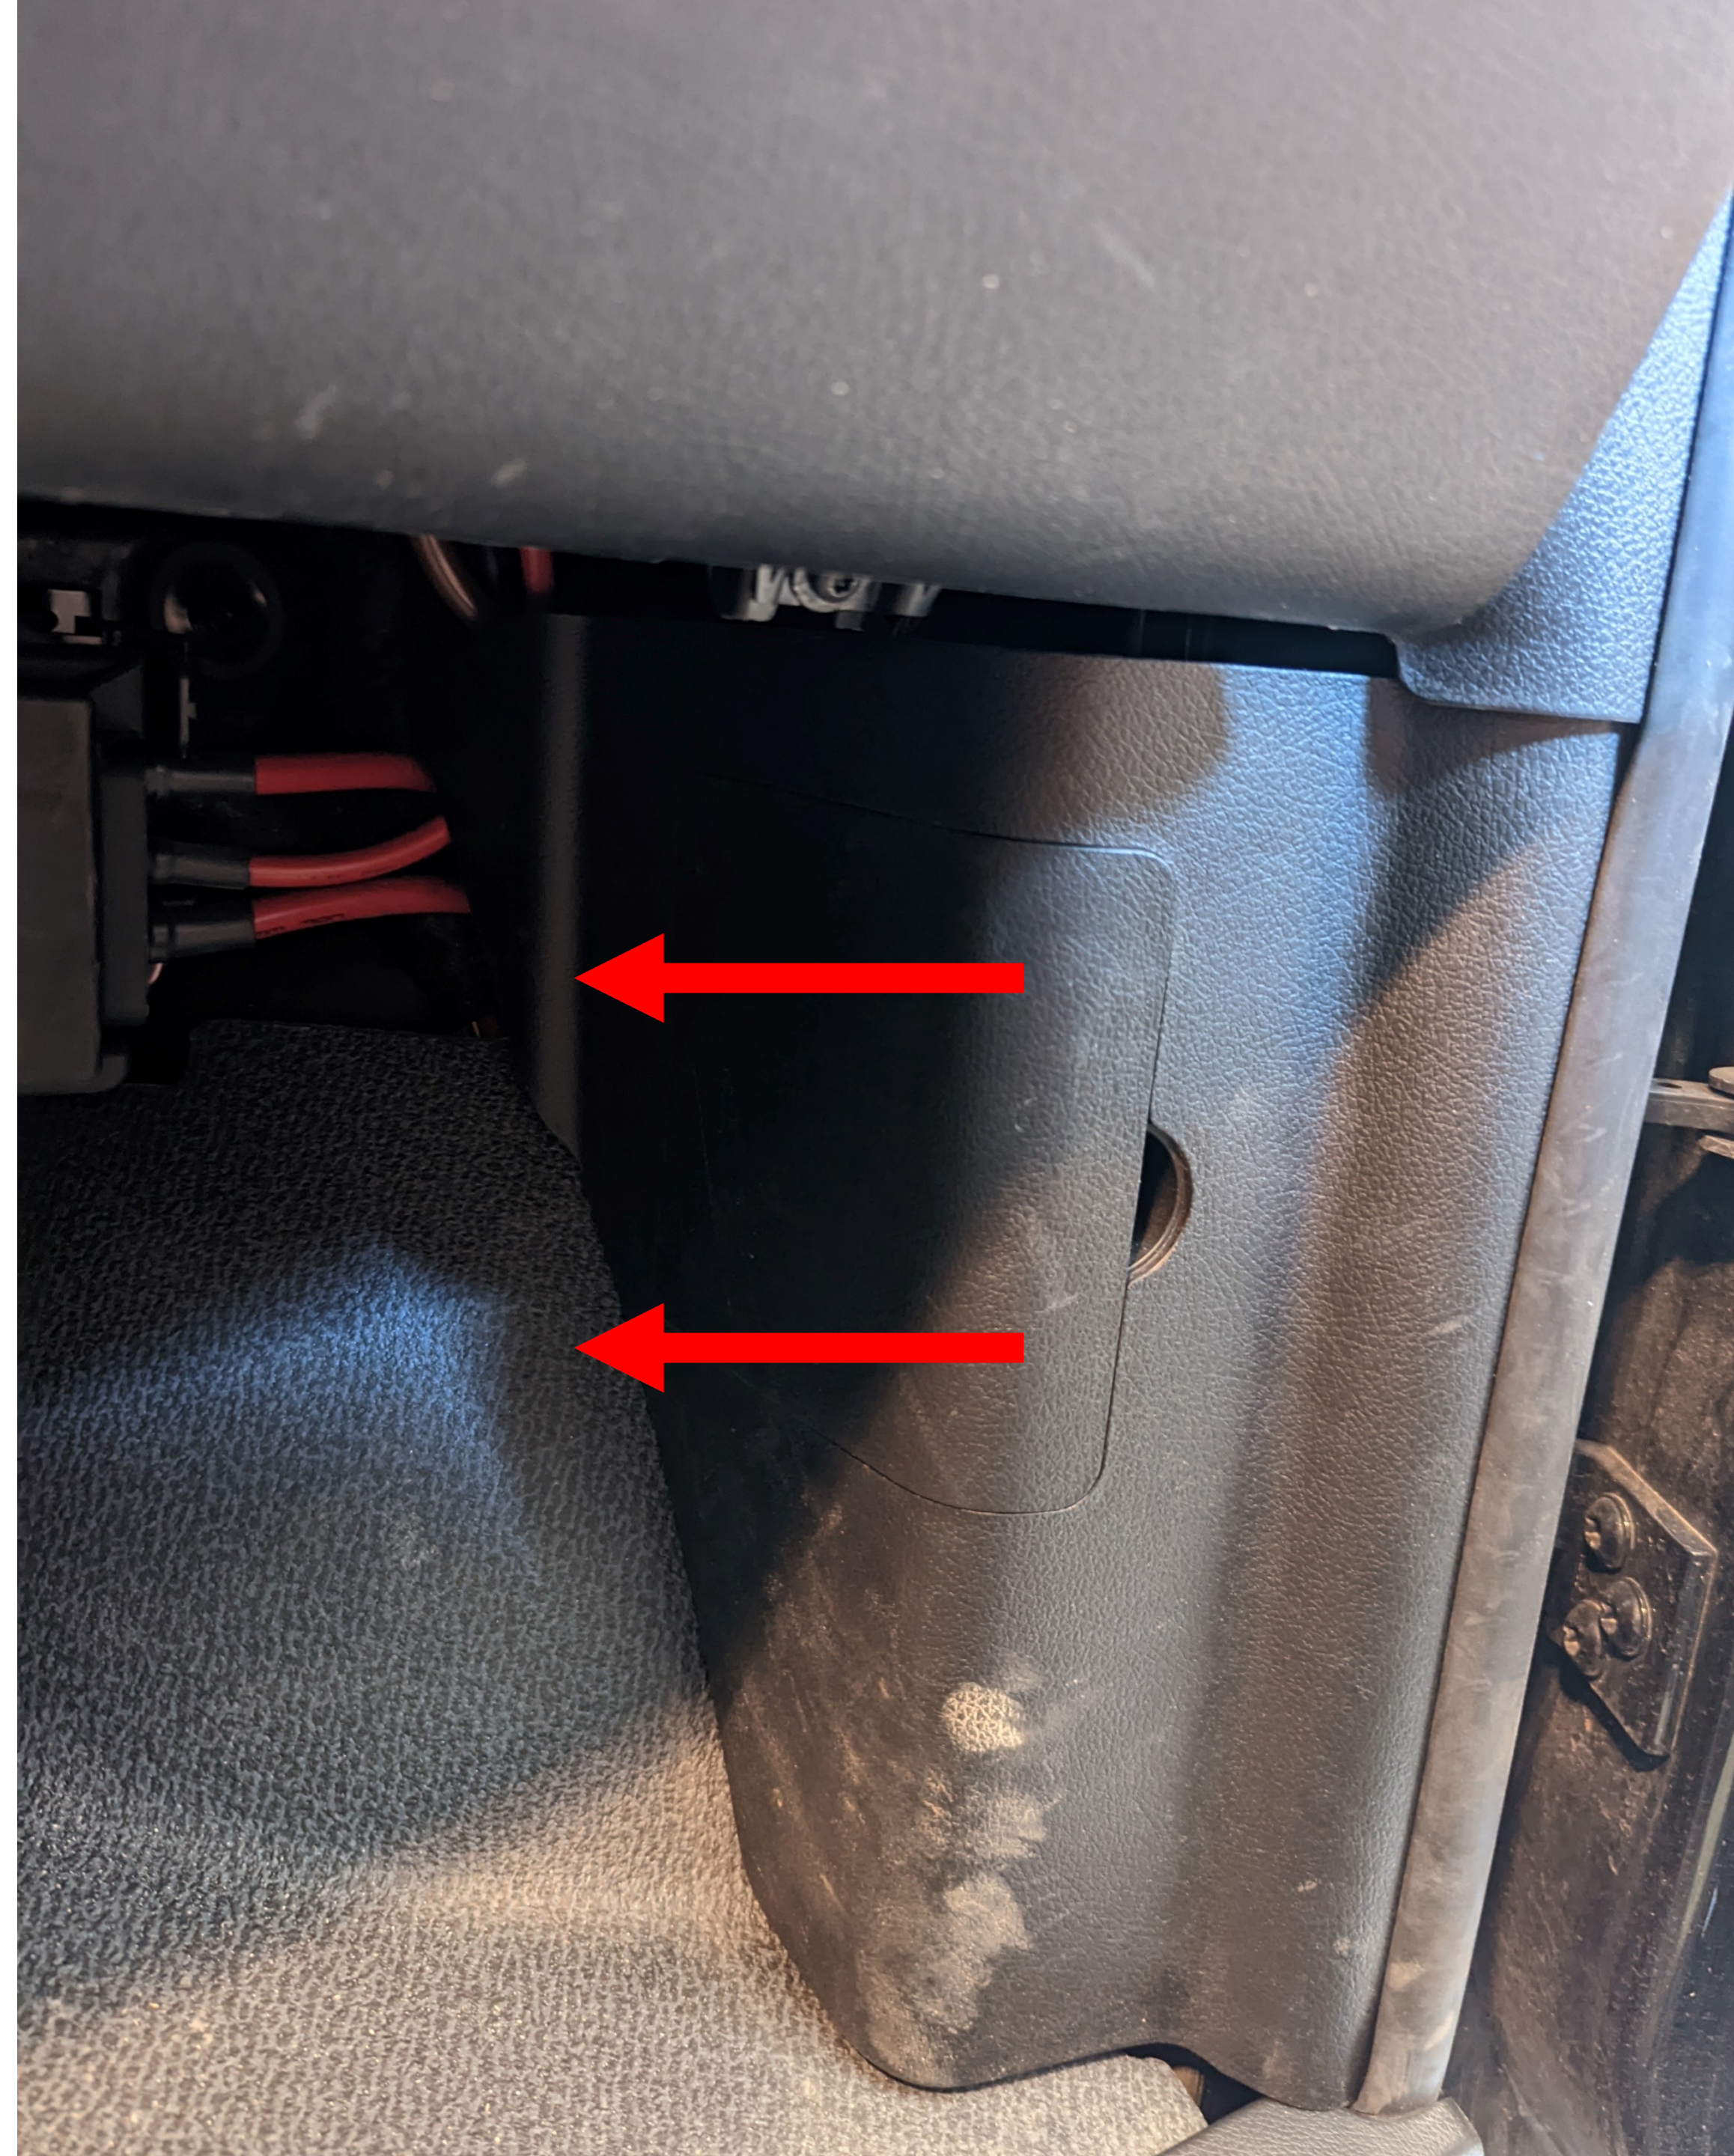

Cable Installation 5

- Loosen the 12V outlet connector by pulling it upwards.

Cable Installation 6

- Remove the side panel by pulling in the direction of the arrows.

Cable Installation 7

- Remove the plastic trim panel for the battery.

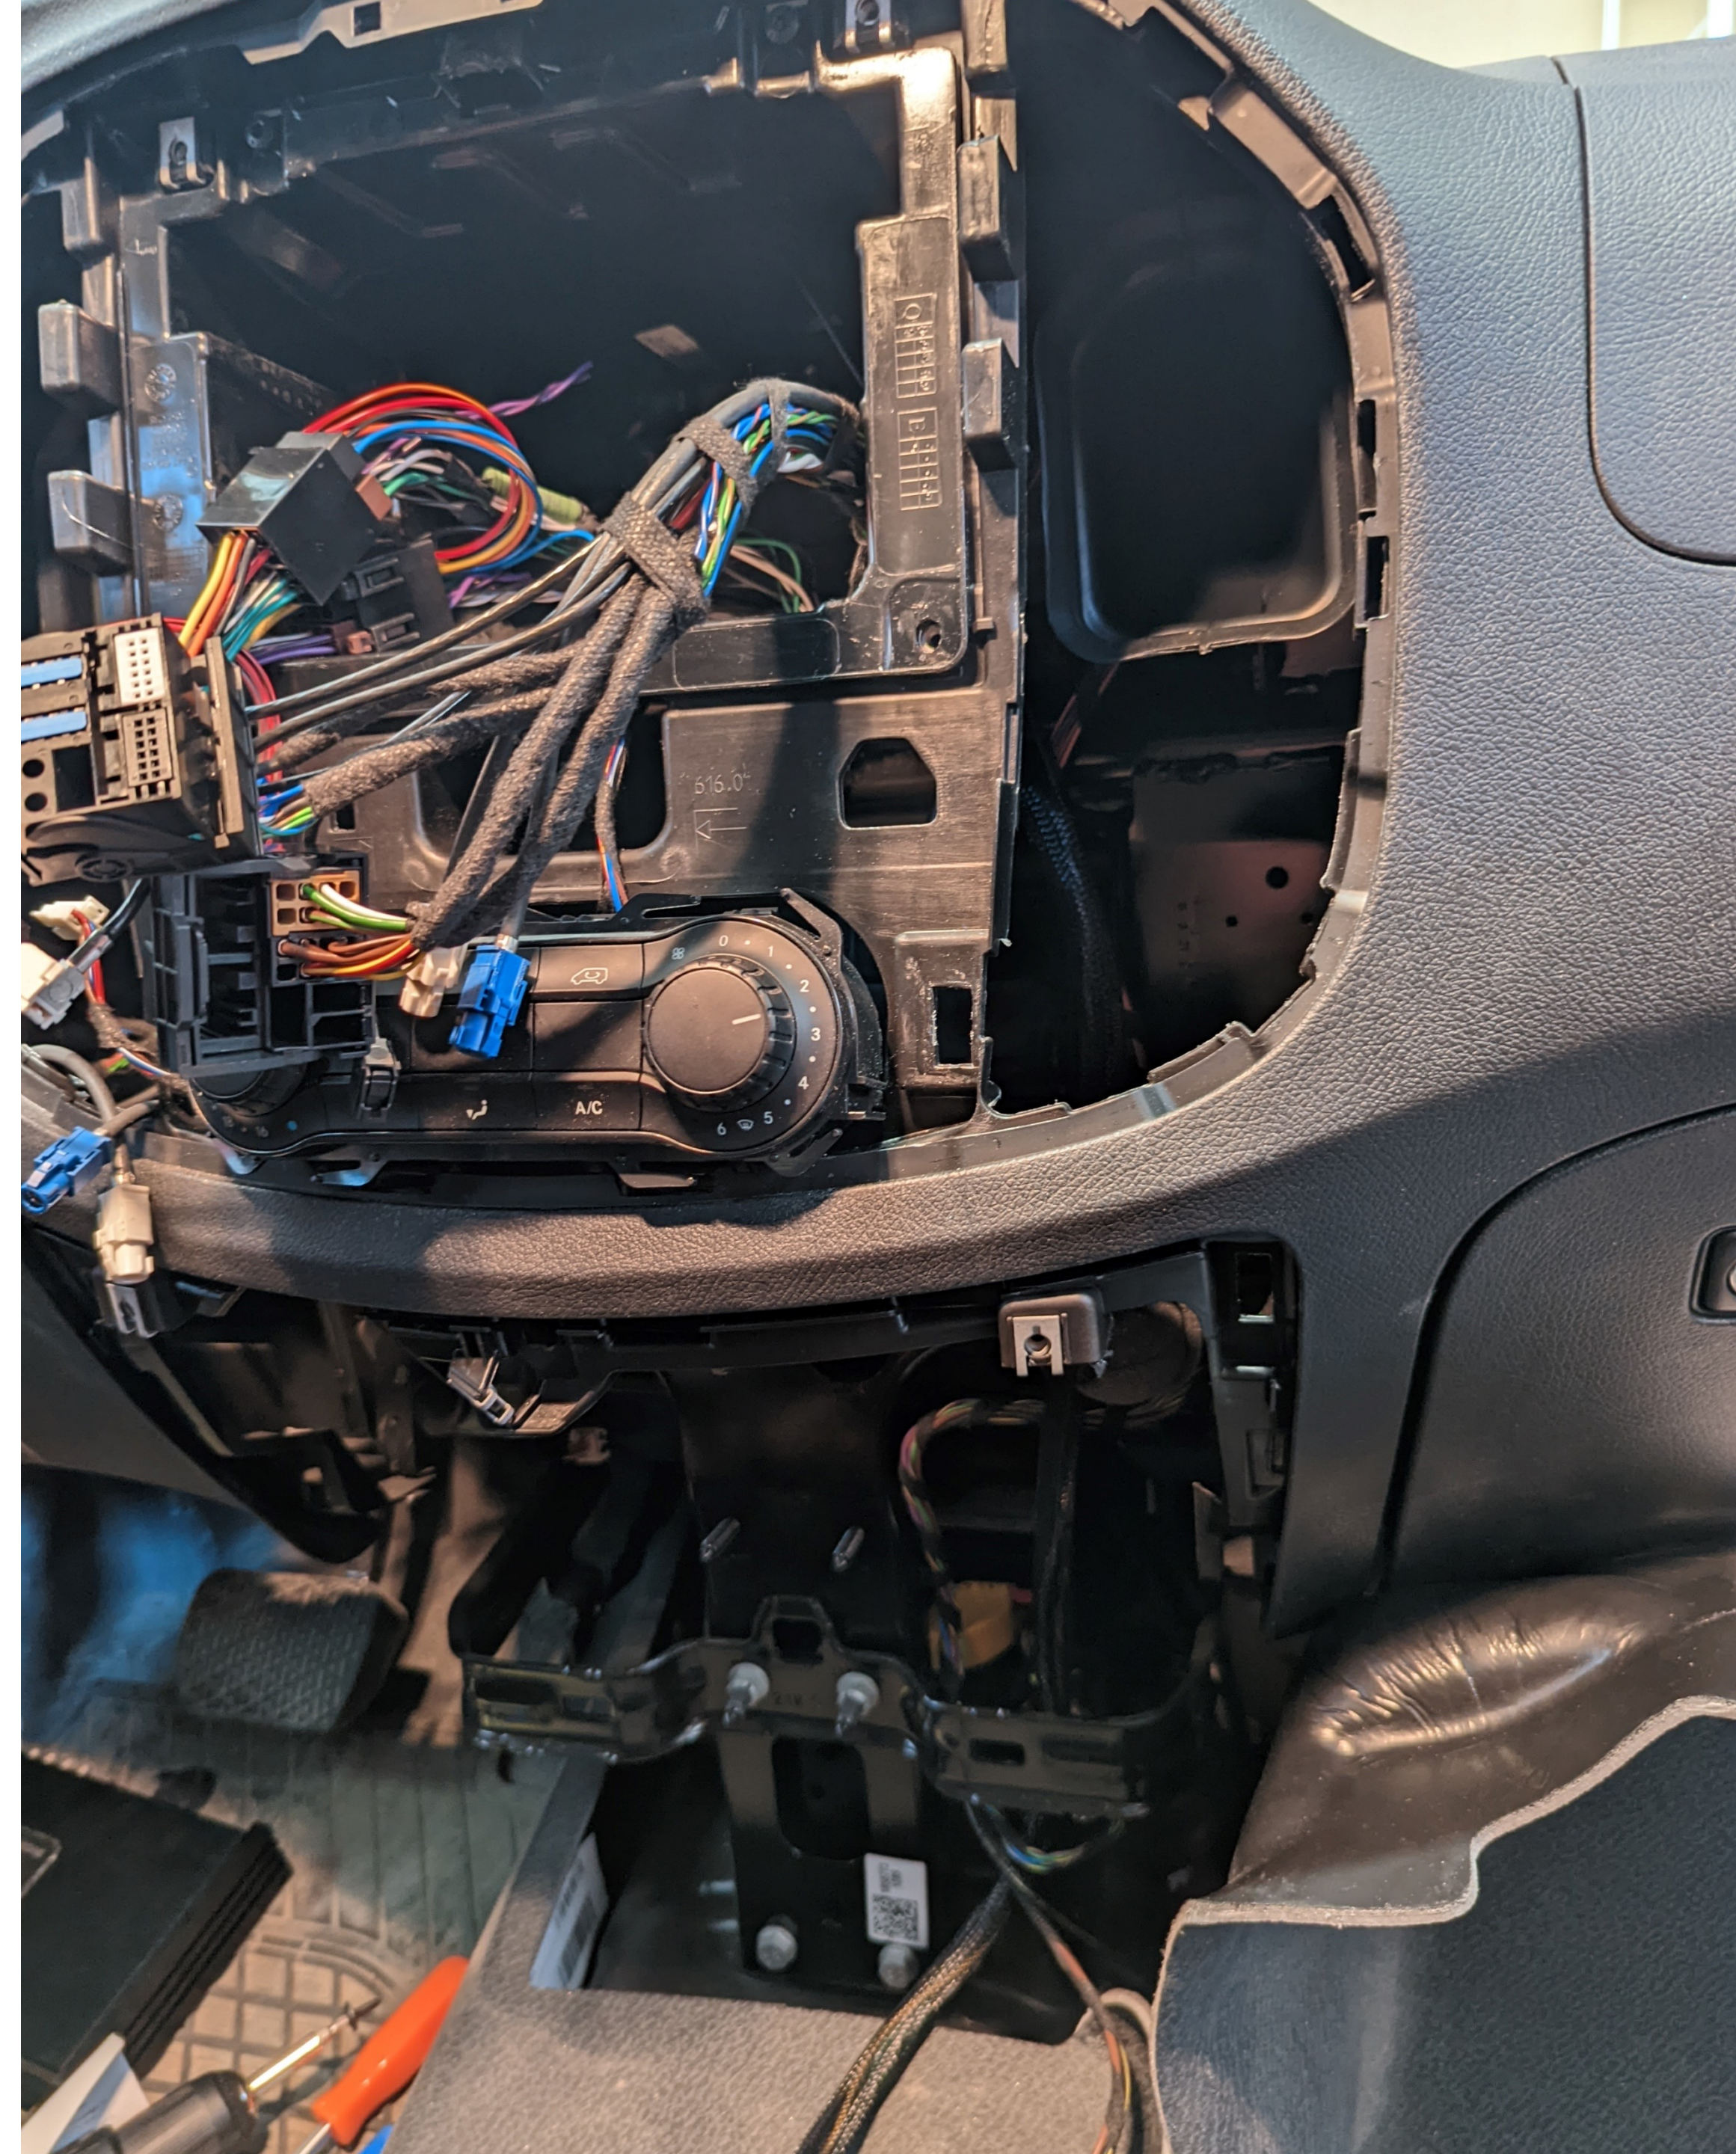

Cable Installation 8

- Pull the side panel upwards to remove it.

Cable Installation 9

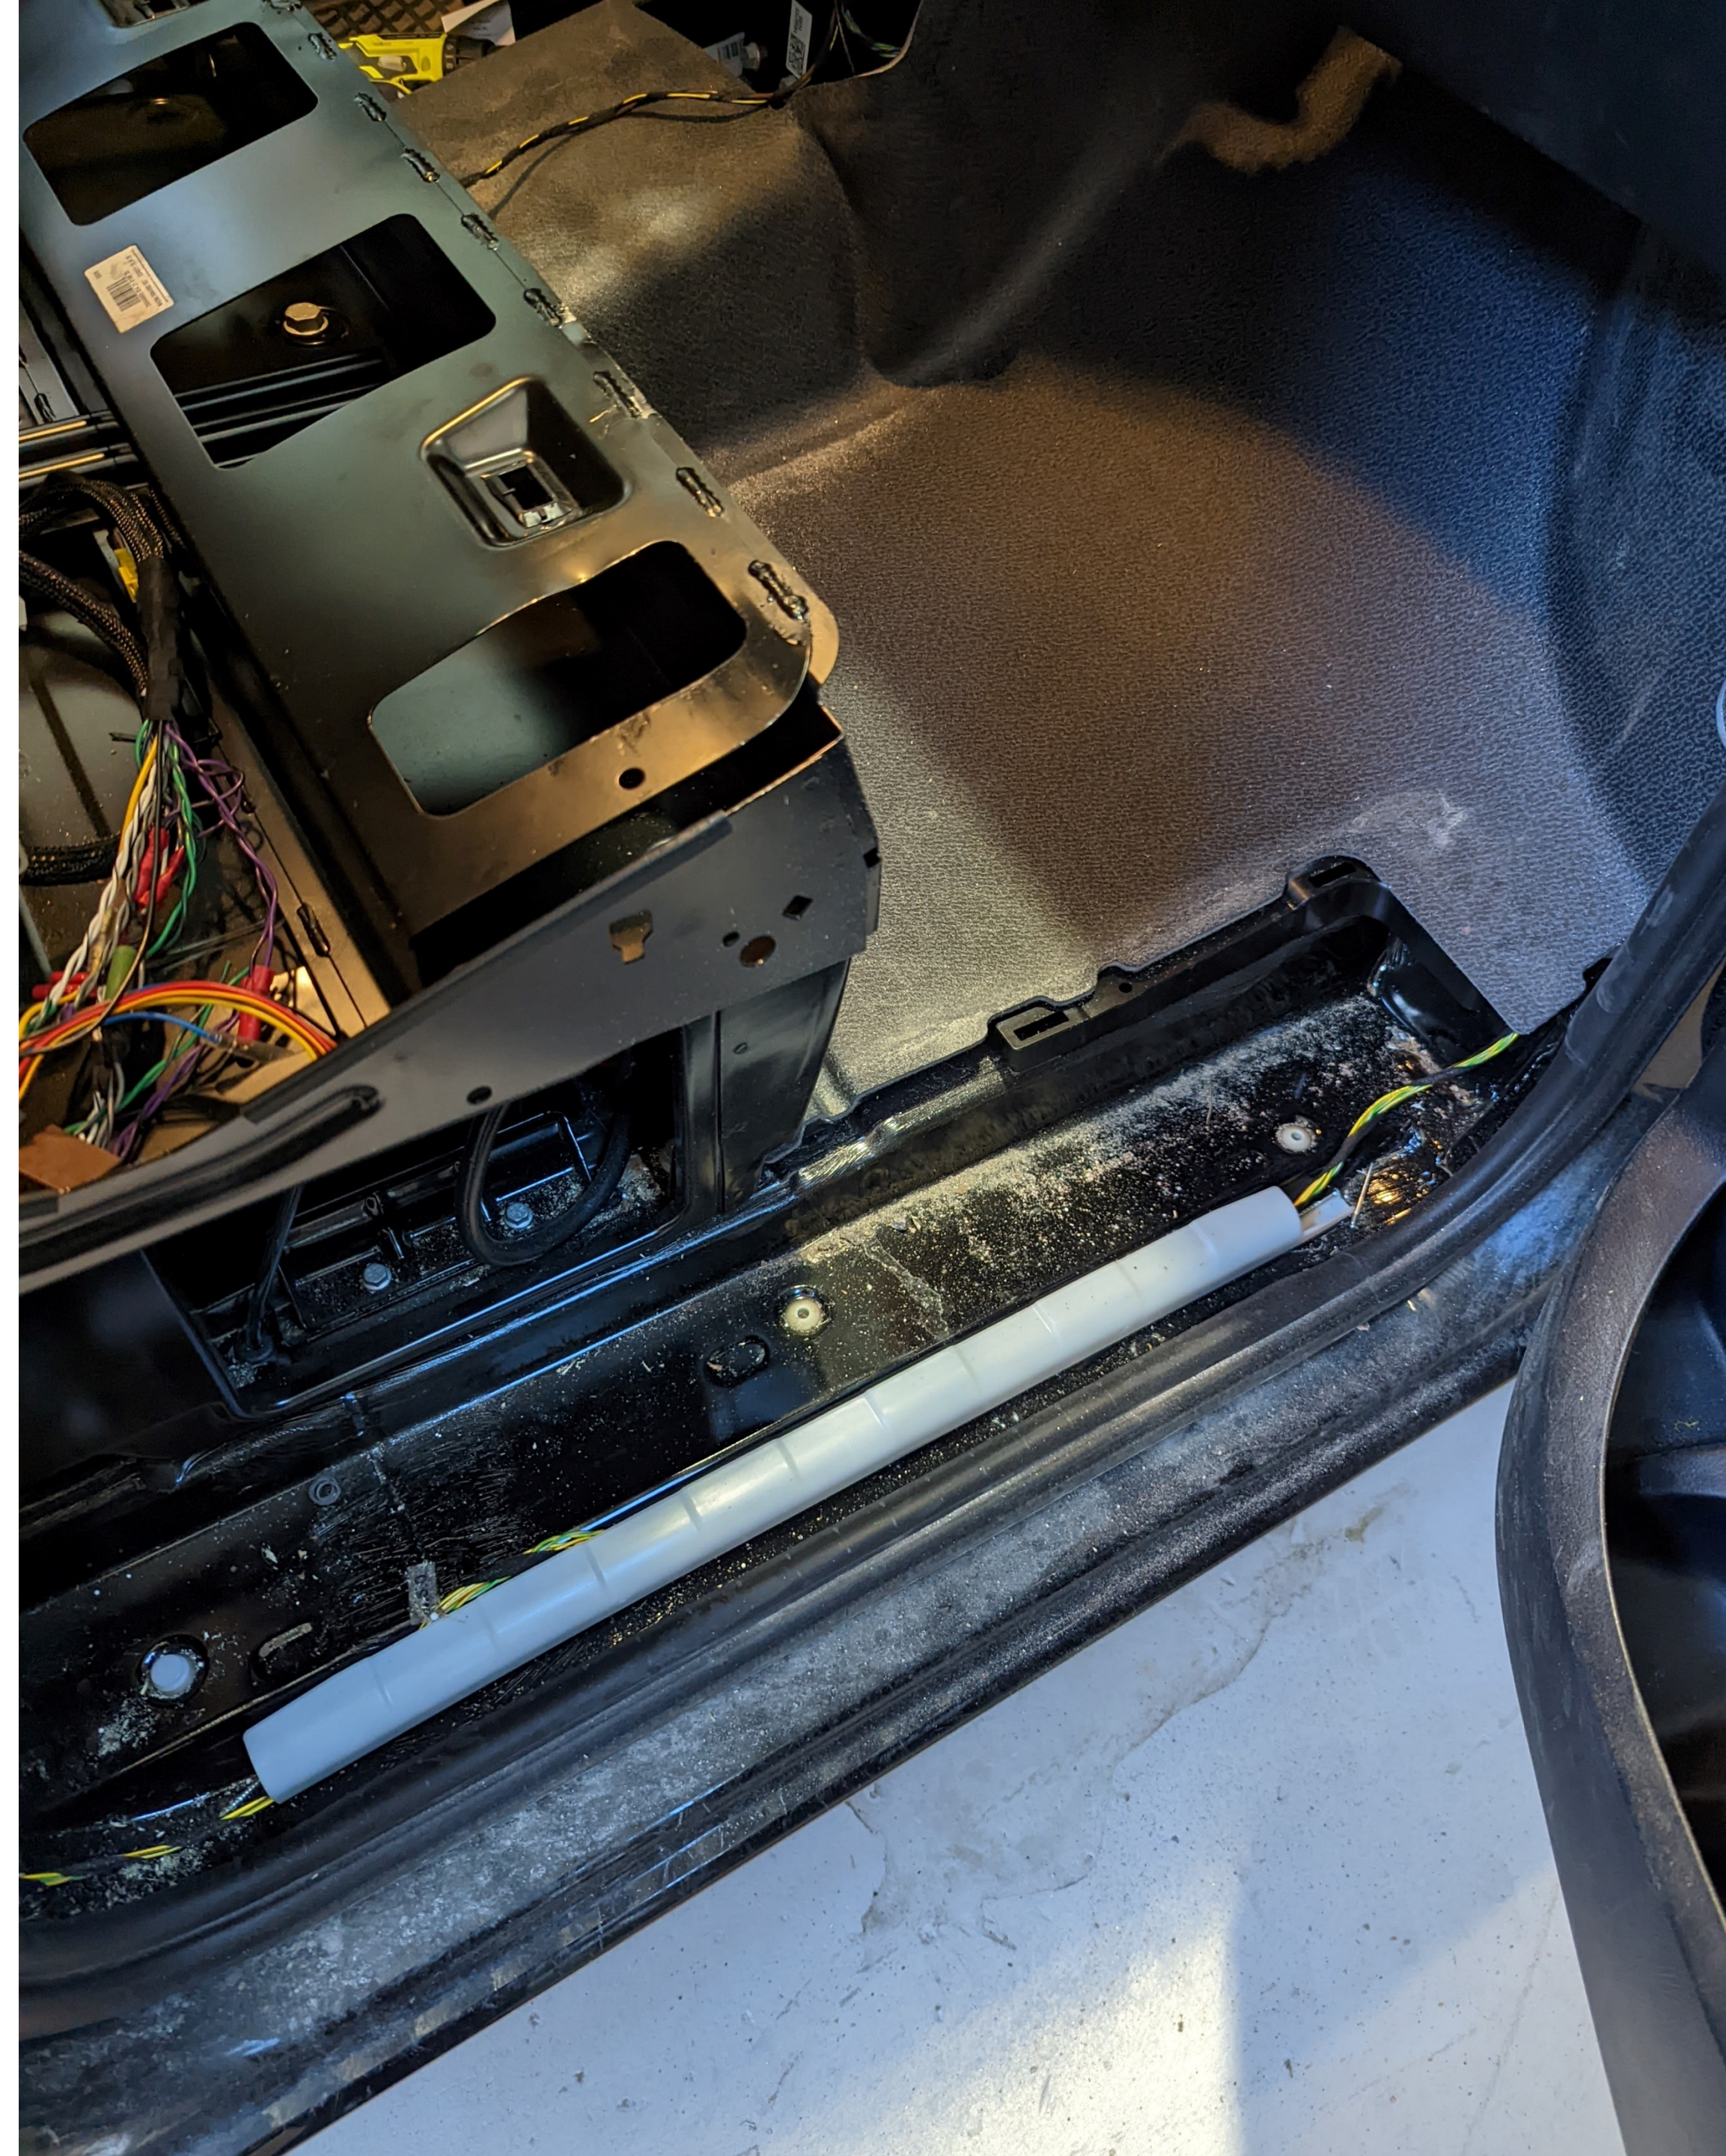

- Connect the ZDAISOT cable to the CT10MC02 and pull the cable down to the floor.
- ***OBS! Use the external 10ohm resistor cable on the speaker side.***

Cable Installation 10

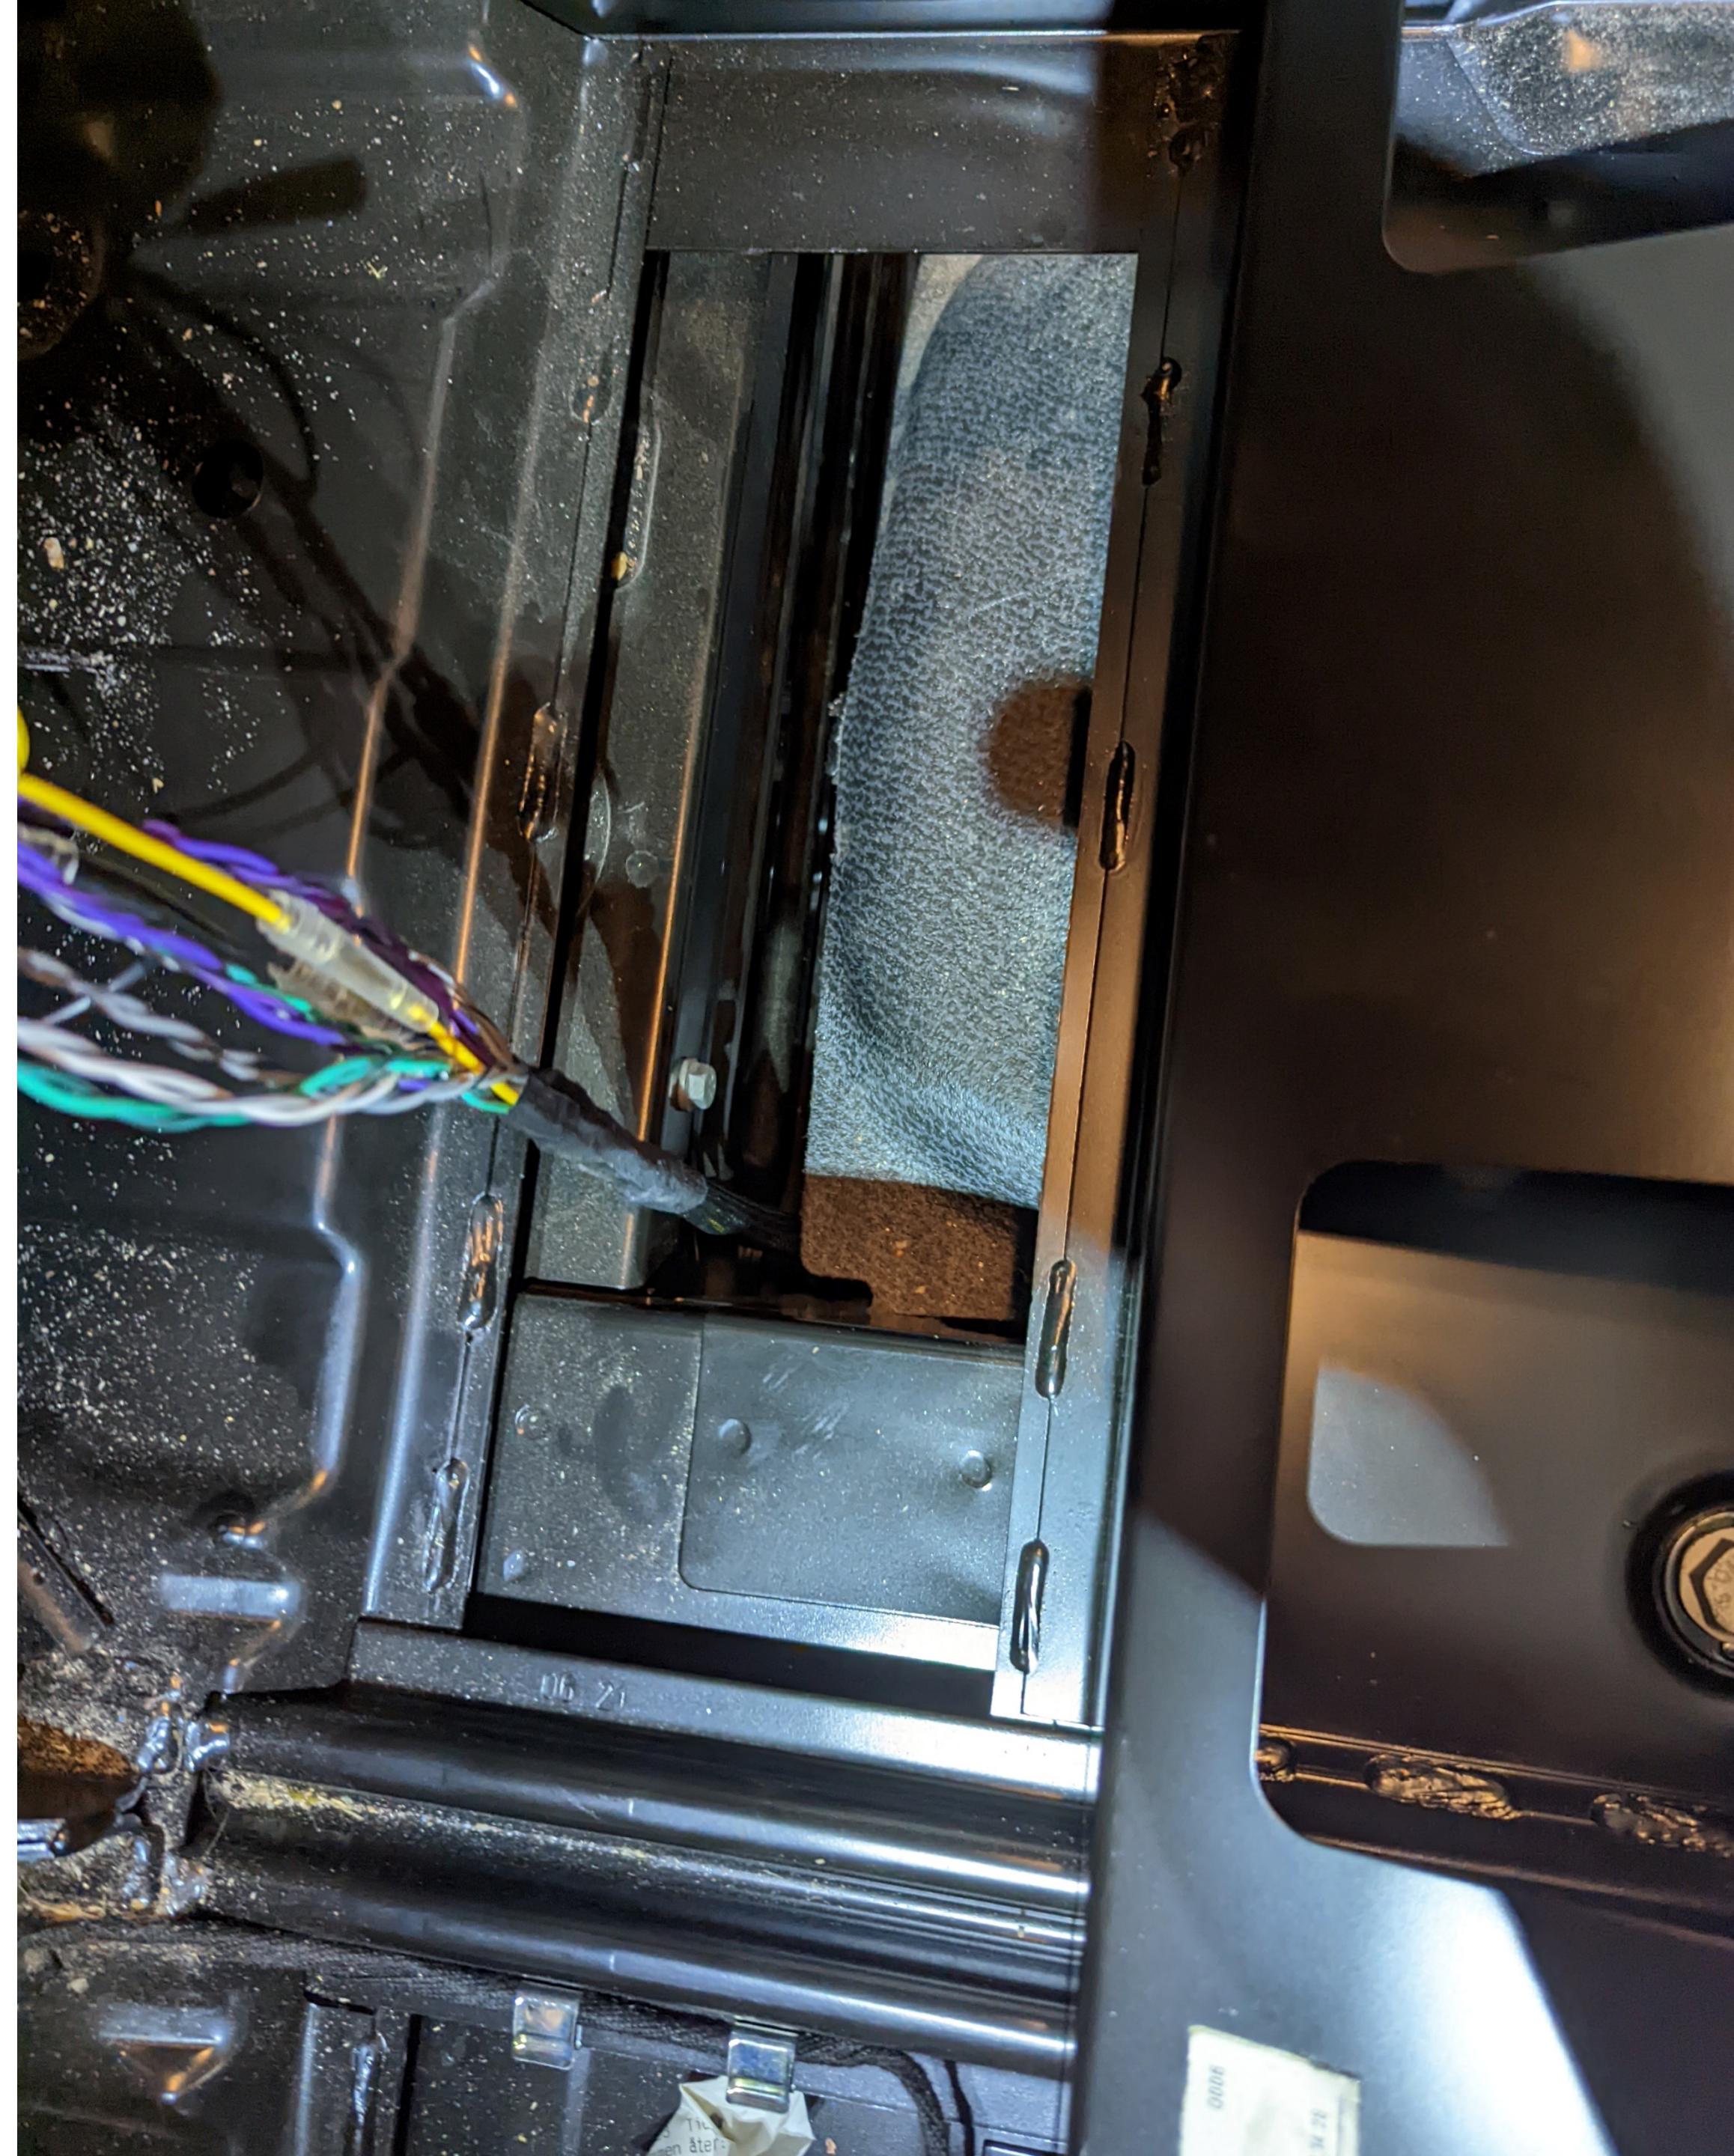

1. Pull the carpet up so that you can pull the cable in the center under the carpet.
2. Remove the passenger seat by pulling it straight up.

OBS! In some cases this may require extreme force.

Cable Installation 11

Pull up the cable at the back.

Amplifier 1

Install the amplifier at the back under the seat.

Amplifier 2

Screw the amplifier into place and connect the ZDAISOT connector cable.

Then put all the panels back in reverse order.

Installation Complete

The installation is now complete.
Now connect the USB cable to a
PC/MAC and download our file at
(någon hemsida) to get the best
result!

Happy listening.
